

Hexaconazole

Hexaconazole is a broad-spectrum fungicide that inhibits ergosterol biosynthesis. It is translocated throughout the plant and controls particularly *Ascomycetes* and *Basidiomycetes*.

- Action:**
- systemic
 - protective and curative

FRAC classification: 3

CAS No.: 79983-71-4

Technical grade: min. 92 %

Formulations: 5 SC

- Packaging¹:**
- 200, 50, 25 kg (tech.)
 - 200, 25, 20, 5, 1 ltr. (form.)

Crops	Diseases	Dose rate ² g a.i./ha
Apple	Scab (<i>Venturia inaequalis</i>), Powdery mildew (<i>Podophaera leucotricha</i>)	100 – 125
Coffee	Rust (<i>Hemileia vastatrix</i>), Coffee berry disease (<i>Colletotrichum coffeanum</i>)	25 – 30
Grapes	Powdery mildew (<i>Uncinula necator</i>)	40 – 50
Groundnuts	Tikka leaf spot	25 – 30
Peas	Powdery mildews (<i>Erysiphe</i> ssp.), Rust (<i>Uromyces pisi</i>)	30 – 40
Rice	Rice blast (<i>Pyricularia oryzae</i>), Brown spot, <i>Fusarium</i> ssp.	25 – 30
Tobacco	Leaf spot (<i>Alternaria longipes</i>)	25 – 30
Tomato	Powdery mildew (<i>Erysiphe cichoriacearum</i>)	25 – 30
